

MAVOPROBE Release Note

Firmware V 1.0.8

Available from: 11.10.2023

Bug fix for firmware version V 1.0.7.

Changes in this version

- The limitation of approx. 2.7 W/m² for the LUX/UVA probe that occurred with firmware V 1.0.7 has been corrected. Previous versions are not affected.

Firmware V 1.0.7

Available from: 19.07.2023

Bug fix for firmware version V 1.0.6.

Changes in this version

- The early limitation to 170 klx or 18 kcd/m² for single-channel probes (B, C, monitor) has been corrected.

Firmware V 1.0.6

Available from: End of February 2023

Bug fix for firmware version V 1.0.5.

Changes in this version

- Fluctuations in measured values have been smoothed out by filtering.

Firmware V 1.0.5

First delivery

This firmware version was delivered with the first MAVOPROBE deliveries.
